## **Spring 2020 Service and Newsletter**

Hello Marina Customers,

Spring is on the way and we are excited about our 7<sup>th</sup> season in business on Buggs Island Lake.

**We offer a “charge, start and run” spring service. We will charge the battery, check the fluids, start the motor and make sure that everything runs properly before you come to use the boat for the first time of the season. Cost for this service is \$75.00.** You can complete the Spring Service Request form (also available at our website under the Tenant Page section) or call the office to schedule the service. Please feel free to contact Catherine or Scott with any questions.

**The first Sunday the marina will be open this year is April 7th.**

Then we will be open every day but Monday - please see the attached spring/summer schedule.

**Check out our website, [www.ruddscreekmarina.com](http://www.ruddscreekmarina.com), which includes a Tenant Page with our hours of operation and service form copies.** There are links to the local weather and lake level. You can also like and follow us on Facebook. **Marina days and hours of operation are also always available on the phone message.**

**Sea Tow is the only boater's assistance company that docks a boat on Buggs Island/Kerr Lake, at Satterwhite Point Marina.** They provide a fast response time if you need help with your boat out on the lake or a tow back to the marina. They have a long and excellent reputation both nationally and locally and we are glad to partner with them when our customers have a problem away from the marina.

**Our gas dock has PREMIUM, NO ETHANOL GAS** along with ice, drinks, snacks, ice cream, water toys, t shirts and marine supplies at discounted prices at one convenient location. Pick up our **2020 Sea Value Discount Marine Catalog**, place your order and have your items waiting at the store for pick up on the weekend.

**There are 2 issues that our insurance companies have mandated we enforce:**

**-We require prior authorization and a workman's compensation insurance certificate** from any outside contractor coming to work on your boat on marina property. We do not mind outside vendors working here but if a copy of their insurance certificate isn't on file, they will be asked to leave the property at once, no exceptions.

**-Insurance and USACE regulations also prohibit the transfer of gasoline onto a vessel from anywhere but the gas dock fuel site** at Rudd's Creek Marina. You can not run a gas caddy down the docks and fuel your boat, you must take the boat and can or caddy to the gas dock and fuel only there at the marina, no exceptions.

Our sister marina, Satterwhite Point Marina, has 2 lakeside cabins for rent with dates still available for this season. Located in a quiet, wooded setting, fully furnished and including a boat dock and large decks, the cabins are perfect for a relaxing getaway weekend or longer vacation. Check out the Satterwhite Point Marina webpage for pictures and more information.

You can also find the same no ethanol gas and marine store if you are boating on that end of the lake.

**Rudd's Creek Marina is a facility for family enjoyment. All tenants are responsible for the behavior of their guests! It is expected that dock tenants will respect the privacy and be considerate of their fellow boaters on the docks. Friendly and nonaggressive dogs are welcome at the marina but please clean up after your pet.**

**Because of all the children and pedestrians, please drive slowly through the marina.**

**Please Note: All marina tenants, their families and guests need to be aware of the risk of electric shock when swimming from a fresh water dock that is energized by electric power,** as all of our docks are. The safest policy we can all adopt is to swim away from the docks at the marina. We have posted an article with more information on our website with copies also available in the marina office.

**We appreciate your business and are looking forward to seeing everyone soon!**

## Spring Service Request Form
